

Müller Containment Valve (MCV)

Transferring highly potent or toxic substances?

Do it safely and efficiently with the new Müller Containment Valve. At last a stable and robust split butterfly valve design that is also pressure-tight! By using the Müller Containment Valve you protect not only the health of your employees but also the purity of your product and the environment. The seal around the valve disk has been made very small to reduce its cost. Simple and quick cleaning means you can increase the hours of operation in your facility. The valve disk can be exchanged in less than 5 minutes.

Details:

- Suitable for OEB 4 (OEL 1–10 µm/m³)
- Dust-tight up to 2 bar gauge
- Liquid-tight up to 2 bar gauge
- Higher pressures possible upon request
- Product-contacted body seal in PTFE
- Product-contacted components in AISI 316L stainless steel, Hastelloy available upon request
- Suitable for CIP
- Suitable for use in hazardous zones
- GMP compliant
- Stable rugged construction
- Available in DN100, 150, 200 and 250
- Tested successfully in 2 years of continuous operation
- Patent pending

We look forward to your inquiry.
